## Weather Monitoring Station Grant Request

### Detailed Description:

The WeatherBug Schools Program is an unique combination of live weather data, dynamic graphics, lesson plans that teach to National and State Education Standards, and Web-based instruction.

The tracking station includes six components, as detailed in the attached document. It is installed on the school roof. Maintenance can be evaluated and diagnosed remotely. This is included in the one-year warranty. The building principal has agreed to budget for any maintenance after this period.

We have cleared the installation with the school maintenance department. We have also cleared the technology with the school technology coordinator.

**NOTE: THE APPLICANT HAS ADDRESSED FUTURE COSTS AND HAS MADE APPROPRIATE INVESTIGATIONS WITH CONCERNED DEPARTMENTS**

### Critical Need:

The WeatherBug lesson plans include hands-on activities like mapping and graphing. It reinforces educational concepts and helps develop skills such as critical thinking and analysis. There are lessons available in math, science and geography. Though this grant is for Richland Elementary, lessons are available for K-12.

### Budget Form:

See attached.

We have contacted the principal and the PTO. Both parties are willing and excited to sponsor this program in part. Our principal has pledged not only support for this startup, but also future maintenance cost.

**NOTE: INCLUDE MATERIALS SUCH AS RECIEPTS, QUOTES OR PRINTED MATERIAL DOCUMENTING COSTS. ALSO DENOTE ATTEMPTS TO SECURE OTHER FUNDING.**

### Recognition:

There will be much communication with the parents regarding this exciting program. We will be proud to include the Foundation Logo on all correspondence. We will also write an article in the District Communicator.

Program

*"In the earliest grades -- kindergarten, first, second and third -- we can address the topic of science by conducting the simplest of experiments and comparing of the data they collect with the WeatherBug Achieve data... And as they get older, it becomes more complicated."*

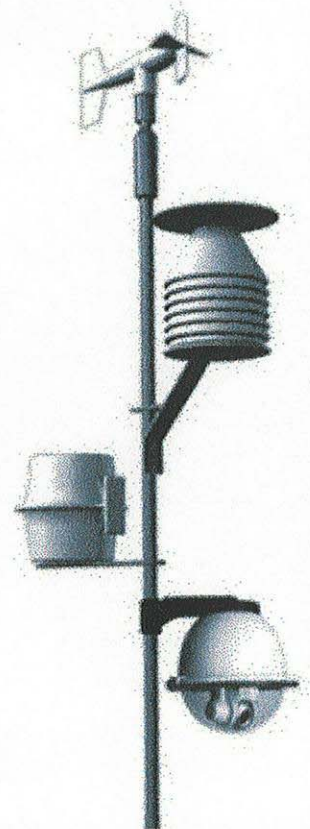

## Out-of-the-Box Weather Monitoring

The WeatherBug Tracking Station is a state-of-the-art, scientific-grade weather monitoring system that's so simple even a child can use it (ask any of the students at our 8,000 WeatherBug Schools).

Built to withstand all kinds of weather, the WeatherBug Tracking Station is easily installed on the school roof, where it records 27 different real-time weather measurements. Its live weather data is fed into our online educational program, WeatherBug Achieve, as well as WeatherBug, WeatherBug.com and, in many locations, to one of 100 broadcast partners across the countries.

### What does the tracking station include?

- **Wind Sensor** [ [view](#) ] - Records wind speed, wind direction, average wind speed, and highest gust for the day.
- **Sensor** [ [view](#) ] - Records 18 weather parameters, including temperature, relative humidity, heat index, barometric pressure, dew point and more.
- **Rain Gauge** [ [view](#) ] - Records five weather parameters, including daily, monthly and yearly rain measurements and amounts of rain per hour.
- **HD Cam** (with HD Package) [ [view](#) ] - Takes new images of the local weather conditions every five minutes in beautiful 1280 x 720.
- **MotionCam** (with Motion Package) [ [view](#) ] - Takes images of local weather conditions and up to eight other subjects every five minutes, with the ability to pan, tilt and zoom with controls from your desktop.
- **BlueBugBox** [ [view](#) ] - An advanced Internet appliance that processes, transmits and stores weather data, with automatic rebooting capability if there are power outages and data recall so you station stays up through vacations, etc.

WeatherBug Tracking Stations and cameras require very little maintenance and all components are "plug and play," meaning once they are plugged in, they go to work.

Should there be a maintenance problem, issues can be evaluated and diagnosed remotely by our unlimited toll-free technical support specialists. WeatherBug Tracking Stations come with a comprehensive 1-year warranty.
